

## IN FOCUS

### Sustainability and ownership of the technical assistance by TRACECA beneficiaries

The LOGMOS Project is organising a study tour for TRACECA stakeholders in the fields of logistics and maritime sector.

#### Study tour to Europe

The LOGMOS team is organising a study tour to Belgium and Germany which will take place on 23-28 June this year.

This five-day study tour is designed for TRACECA beneficiaries from logistics and maritime sectors, and aims to present to the participants state-of-the-art technologies and procedures in the field of maritime transport and logistics processes applicable for TRACECA.

Participants will be offered tailored site visits and workshops at the ports of Duisburg and Antwerp to meet representatives of maritime and logistics industry, gain a better insight into the West European best practice and exchange views and experiences and with their counterparts in Germany and Belgium.

Besides, a training programme in corridor logistics has been elaborated for TRACECA counterparts. The applied training will be delivered with support of the leading logistics initiatives and institutions, and global market logistics players active in TRACECA.

The training will focus on the international corridor references in terms of a comprehensive logistics programme as integral part of the master plan. This includes various aspects of the development of logistics networks as crucial components of international transport corridors. Participants will share EU best practice and practical examples of activities aimed at the promotion of regional logistics networks, regional and bilateral cooperation mechanisms, coordination and networking between project owners and stakeholders, cargo distribution networks, intermodal transport, pilot projects on modal shift from road to rail transport,

container logistics, etc.

The LOGMOS team will also use the opportunity to present to the stakeholders the LOGMOS master plan connecting this with the goals and objectives of the study tour.

The fact that now representatives of the new generation of transport professionals participate in the LOGMOS study tour is an excellent example of the sustainability of the EU technical assistance to TRACECA countries, and ownership demonstrated by beneficiaries.

#### LOGMOS Master Plan – State of play

The LOGMOS team continued working on the development of the LOGMOS master plan and case studies. A master plan concept was elaborated in stakeholder consultations and reflects the vital points of TRACECA corridor development in logistics and Motorways of the Sea dimensions.

The MCA methodology for pilot projects was agreed upon already during the first year of project implementation, and the MCA for selected pilot projects has been recently finalized.

Case studies for the Block Container train, the road access to Zvartnots Airport Logistics Centre, potential of Dnieper,

potential of Danube, Ukrainian transit potential were completed.

Thematic reports for all of transport modes, shipping and multimodal capabilities are being elaborated to become part of the LOGMOS master plan.

#### Support to regulatory adjustments

The project carried out an assessment of the maritime and intermodal legislation in beneficiary countries. The related considerations will be included the master plan. The project suggested a monitoring mechanism for regulatory adjustments, which is also incorporated in the action plans and will be included in the master plan.

#### In this issue:

Study Tour to Europe will be held on 23-28 June 2013.
